

AMENDMENTS TO THE SPECIFICATION

Please amend paragraph [0026] as follows:

[0026] Lines 210B-7-210B-8 contain the behaviors of the operating system service 210B. Line 210B-7 contains a behavior sentence: $B = \text{OPEN}.BP$, where B is a behavior rule; OPEN denotes that the OPEN operation is the first operation to be invoked in a session with the operating system service 210B; the period "." denotes that the additional behaviors are to follow the invocation of the OPEN operation; and BP refers to a second behavior sentence defined further on line 210B-8. Line 210B-8 contains the following behavioral sentence: $BP = \text{REPRO}[[R]]\text{DUCE}.BP + \text{CLOSE}$, where BP denotes the second behavior; REPRODUCE.BP denotes the invocation of the REPRODUCE operation, which is then followed by the second behavior again (a recursion); CLOSE denotes the invocation of the CLOSE operation; and the plus sign "+" denotes choices that an external service, such as the operating system service 210A, can make to invoke among the REPRODUCE operation and the CLOSE operation.
